Seattle, WA | (253) 970-0091 | ReidMiller999@gmail.com

SKILLS

Programming: Javascript, Python

Web Development: React (Hooks), Node.js, Express, HTML, CSS, Bootstrap, SQL/Postgres, NoSQL/MongoDB, Django, GitHub, Heroku

Programming Projects

Event Search - Sports/Music/Comedy Event Search

- Created a web app that would help users find events occurring in the Seattle area based on Sports, Music and Comedy categories.
- This is a full stack app created with React using React Hooks and a MongoDB backend, using the TicketMaster API for all the event information.

Nutri Facts - Nutritional Tracker

- Team project that set out to create an app that would help users track their nutritional facts and set goals for themselves.
- Created with React, Node/Express, Mongoose, JavaScript and CSS along with the Edamam API for all nutritional facts.
- Collaborated with UX Design students to help us plan out the layout of our app for better user experience.

GameDatabase - Video Game Search App

- Created a web app that allows users to access video games information and save their favorite game to their profile.
- Developed, designed and implemented a full stack app in Node.js, Express and EJS, using the IGDB API for video game information.
- Implemented a SQL database using Sequelize and PostgreSQL.

Yahtzee - Browser Game

- Created a Yahtzee game clone in the web browser using HTML, CSS and JavaScript.
- Recreated functionalities of the original game in JavaScript to give the original game feel.
